BorgWarner Turbo Systems

Turbochargers from BorgWarner Ningbo - China

Dear Distributor,

Due to ongoing supplier and capacity constraints – caused by the economic crisis – we are investigating new supplier and product launches. The required verifications will have a timeline of 6 to 12 months, related to OEM guidelines, and will not be completed in the immediate future.

Therefore we have decided to source selected turbochargers for the European Independent Aftermarket from other approved and certified BorgWarner plants around the world – including from our production plant in Ningbo, China.

The current available and approved part numbers as listed.
